ABOUT ME

Full Stack Developer and Economist. I create applications and automate processes to help businesses become more efficient. I combine my technical expertise with a clear business vision, transforming complex data into practical solutions that save time and improve profitability.

EDUCATION

DEGREE IN ECONOMICS - CURRENT EVENTS UNIVERSITY OF GIRONA

- Data analysis, financial modeling, and strategic decision-making.
- **The value I bring: I evaluate how technological decisions impact the company's profitability and social environment.**

DEGREE IN WEB APPLICATION DEVELOPMENT

- Creating modern and complete applications from scratch (Angular, Laravel, Node.js, React, Docker).
- **The value I bring: I design digital products from start to finish (end-to-end), ensuring both an excellent visual experience for the client and impeccable technical performance on the server.**

DEGREE IN MICROCOMPUTER SYSTEMS AND NETWORKS

- Equipment maintenance, network setup and systems administration.
- **The value I bring: I know the technical infrastructure from the ground up, which allows me to quickly solve hardware and software problems.**

SKILLS

Front-End: Angular, React, HTML5, CSS3, Tailwind, Bootstrap, Ionic, Flutter, Dart
Back-End: Node.js, Laravel, Express, REST APIs, PHP
Database & Cloud: MySQL, MongoDB, Firebase, Docker, Big Data
Data & Analytics: Python, Pandas, Scikit-learn, R, RStudio, Power BI, Matplotlib, NumPy
AI & Automation: OpenAI API, NLP, Web Scraping
DevOps: Git, GitHub Actions, CI/CD, Linux, Bash
Web Technologies: TypeScript, WebSockets, JWT
Economics & Business: Microeconomics, Financial Analysis, Function Modeling, KPIs, ROI
Project Management: Jira, Trello, Scrum, Kanban, Agile Methodologies
Workflow: End-to-end workflow, Technical Documentation, CI/CD
Soft Skills: Problem Solving, Effective Communication, Creativity, UX/UI, Teamwork, Technical Leadership

WORK EXPERIENCE

Full Stack Developer | GIFOOD delivery

What I did: I led the complete rebuild of the delivery platform (app and server) to make it faster and more stable.

Key metrics:

- I improved the service for more than 5,000 users.
- I automated a tedious manual process, reducing a task that took hours to just 5 minutes (with a single click).
- I reduced the technical setup time of the project by 75%.

Full Stack Developer Junior | Mycheftool

What I did: Development and maintenance of web and mobile solutions, integrating Artificial Intelligence models for the optimization of internal processes.

Key metrics:

- AI Automation: 35% increase in performance through automated data entry.
- Improved system efficiency by 25% through frontend and backend updates.

Web & Data Systems Developer | Orpheus

What I did: Optimization of web platforms and creation of scripts for the automated management of data from smart sensors.

Key metrics:

- 50% improvement in website efficiency through custom PHP scripts.
- 40% reduction in data processing time through the development of tools in Python.

IT Instructor & Preschool Educator | Innova't Education

What I did: Design and delivery of robotics and STEM programming workshops for children.

Key metrics:

- I translate computational logic into an accessible language, demonstrating a complete mastery of programming fundamentals and excellent technical communication skills.
- Planning of more than 15 interactive activities, achieving 90% active participation and improving problem-solving skills by 40%.

IT Support Specialist | Alcampo – Technical management of infrastructure, monitoring and resolution of hardware/software incidents to ensure uninterrupted operations.

POS & Data Management Specialist | Palmira Customization of Point of Sale (POS) systems and analysis of financial data for the optimization of business decisions.
